                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     TITLE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sg
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           source
                                                                                                                                                                                                                            variation
                                                                                                                                                                                                                                                                                                                   variation
                                                          variation
                                                                                                    variation
                                                                                                                                            variation
                                                                                                                                                                                                                                                                         variation
                                                                                                                                                                                      variation
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The two cDNA clones, pcP-450(11 beta)-2 and pcP-450(11 beta)-3 were isolated from a cDNA library. pcP-450(11 beta)-2 has already been sequenced in [J. Biochem. 102, 559-568 (1987)]. Chua et al. also isolated and sequenced similar cDNA clones, pB-11s in [2]. Nucleotide sequence determination revealed the substitutions of 14 nucleotides and 3 amino acids between pcP-450(11 beta)-2 and -3. And 4 nucleotide and 3 amino acids acid substitutions were found in the coding region between pcP-450(11 beta)-3 and pB-11s. Blotting analysis indicated that at least two kinds of p-450(11 beta) mRNA were expressed in individual animals and that at least two kinds of p-450(11 beta) genes exist
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Miyata,T., Sogawa,K., Fujii-Kuriyama,Y. and Omura,T.
Molecular cloning and nucleotide sequence of DNA of mitochondrial
cytochrome P-450(11 beta) of bovine adrenal cortex
Cytochem. 102 (3), 559-568 (1987)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Cloning of cDNA encoding steroid 11 beta-hydroxylase (P450c11)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Chua, S.C

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Several collagen genes have been isolated from C.elegans. [1] shows given sequence and that of col-1 (see separate entry), and finds a high degree of homology between the two, particularly in the regions around cysteines and lysines. col-1 and col-2 apparently are cuticle collagen genes [1].

Draft entry and printed copy of sequence [2] were kindly provided by J.M.Kramer, (05-AUC-1985).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         pCol-2(a,b) [2].
